

POS Limited Product & Customer Loading

- This Extends loading feature of data from the Backend in the Pos. User can set Limit of Products and Customers are loading in the Pos. and also set remaining Products and Customers are loading in the background.

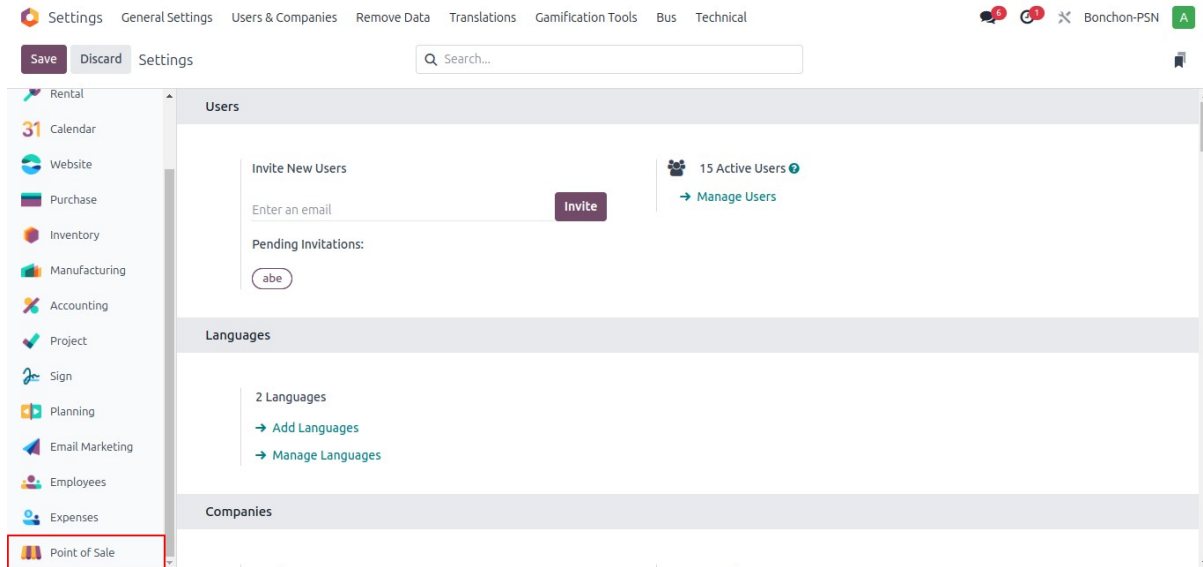

1. First we have to install the module 'lo_pos_product_and_customer_limit'.

2. To set limit of products and customers in POS, Go to settings.

3. Go to POS section and select Pos.

6. Then Go to POS App, and open appropriate POS and Open it, we can see pos loading is very fast.

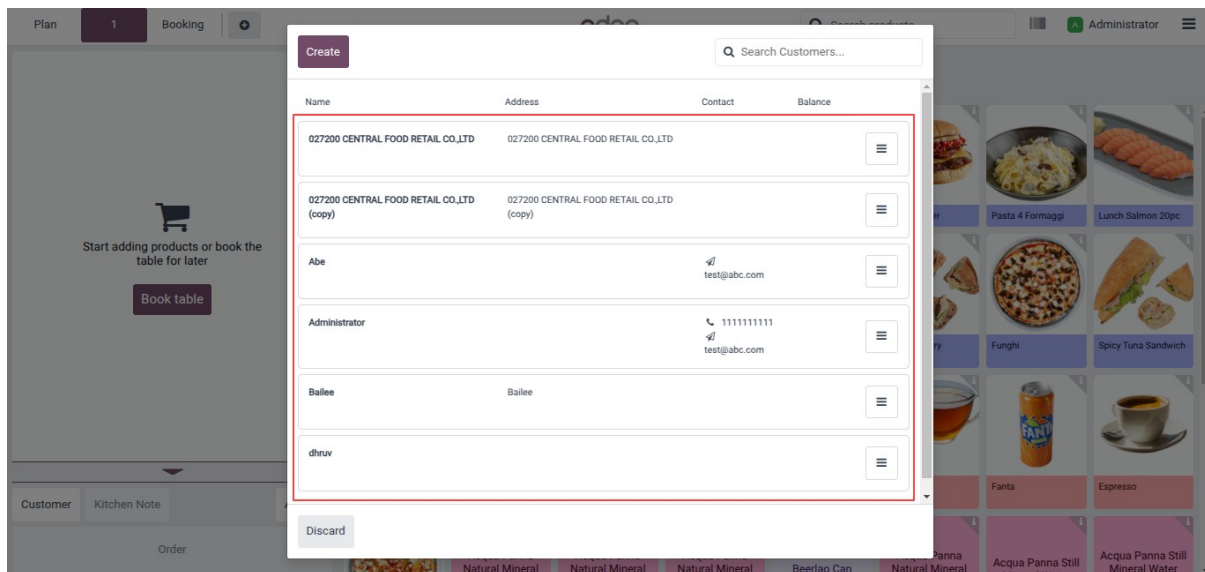

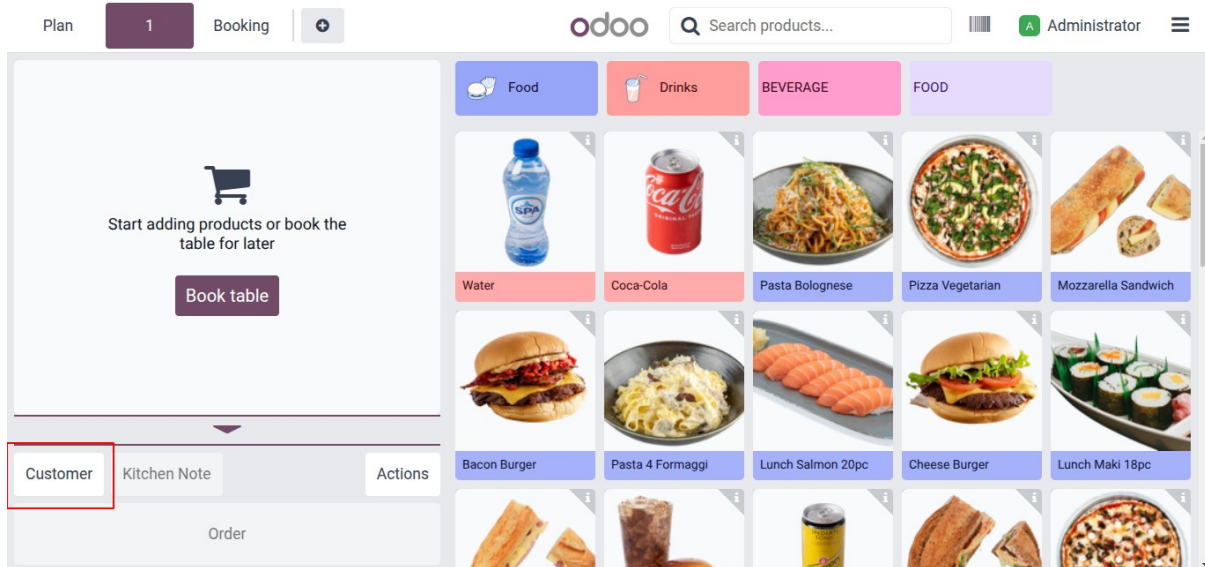

7. Pos is loading very fast.

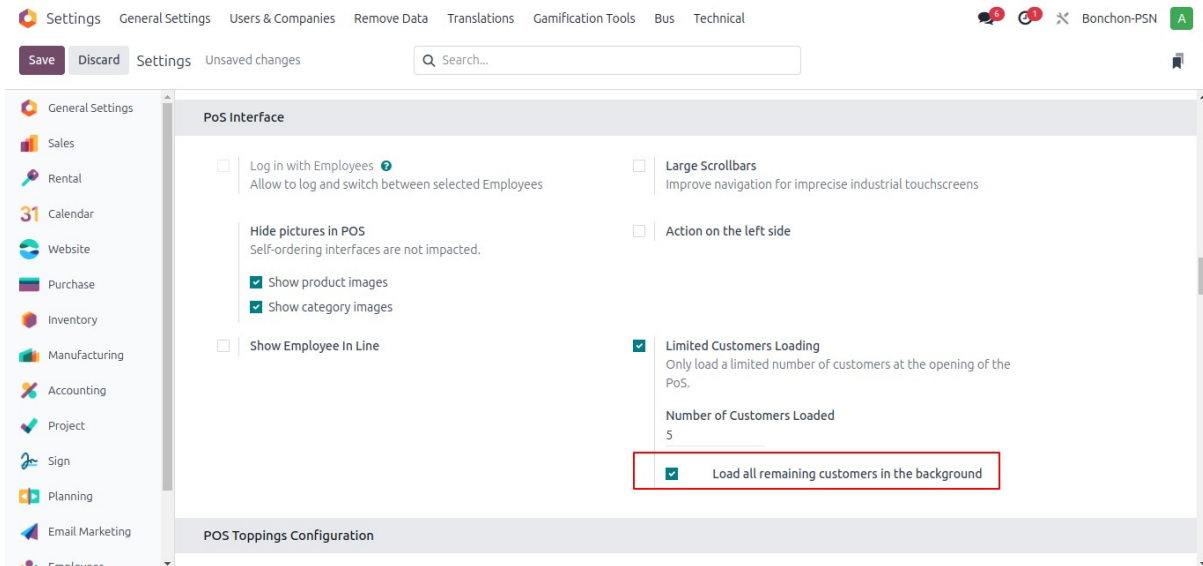

8. In the Pos we can see limited products and it's related product category is loaded.

9. Click the '**Customer**' button for See our customer. Here we can see only 5 Customers are loaded as per we configured in settings of Pos.

10. Go to Pos Settings of Current Pos, Go to Pos interface sections and enable Load all remaining customers in the background. For same as go to inventory section and enable Load all remaining products in the background. For load all products and customers in the background of POS.

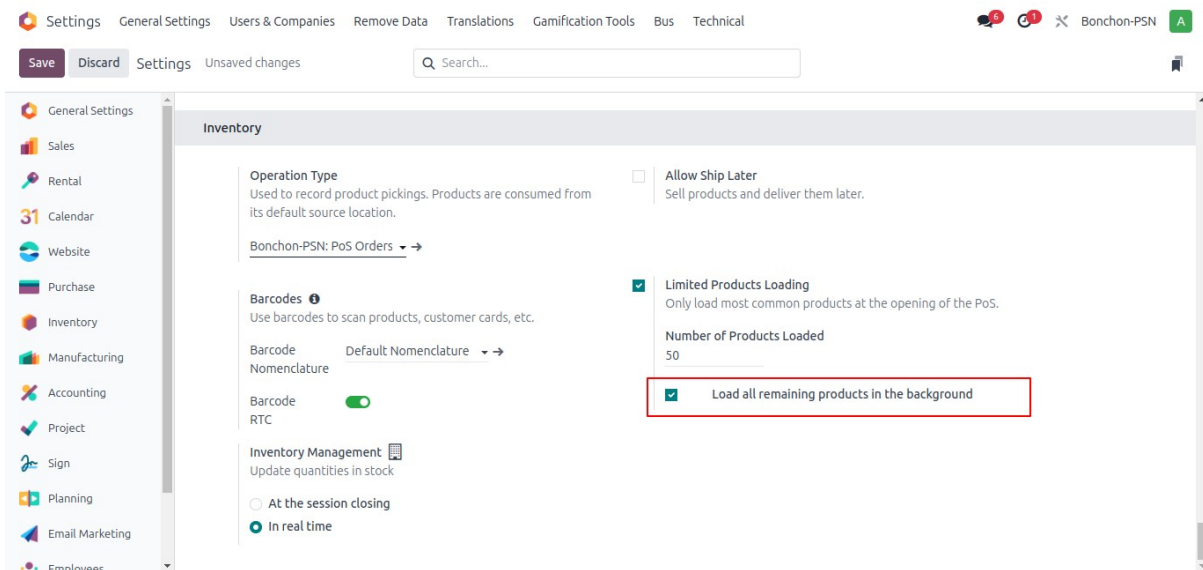

The screenshot shows the 'Pos Interface' settings section. The left sidebar contains a list of settings categories: General Settings, Sales, Rental, Calendar, Website, Purchase, Inventory, Manufacturing, Accounting, Project, Sign, Planning, Email Marketing, and Employees. The 'Pos Interface' section is active, showing various configuration options. The 'Load all remaining customers in the background' checkbox is checked and highlighted with a red box.

Pos Interface

- ☐ Log in with Employees
Allow to log and switch between selected Employees
- ☐ Large Scrollbars
Improve navigation for imprecise industrial touchscreens
- Hide pictures in POS**
Self-ordering interfaces are not impacted.
 - ☒ Show product images
 - ☒ Show category images
- ☐ Action on the left side
- ☐ Show Employee In Line
- ☒ Limited Customers Loading
Only load a limited number of customers at the opening of the PoS.
Number of Customers Loaded: 5
- ☒ Load all remaining customers in the background

POS Toppings Configuration

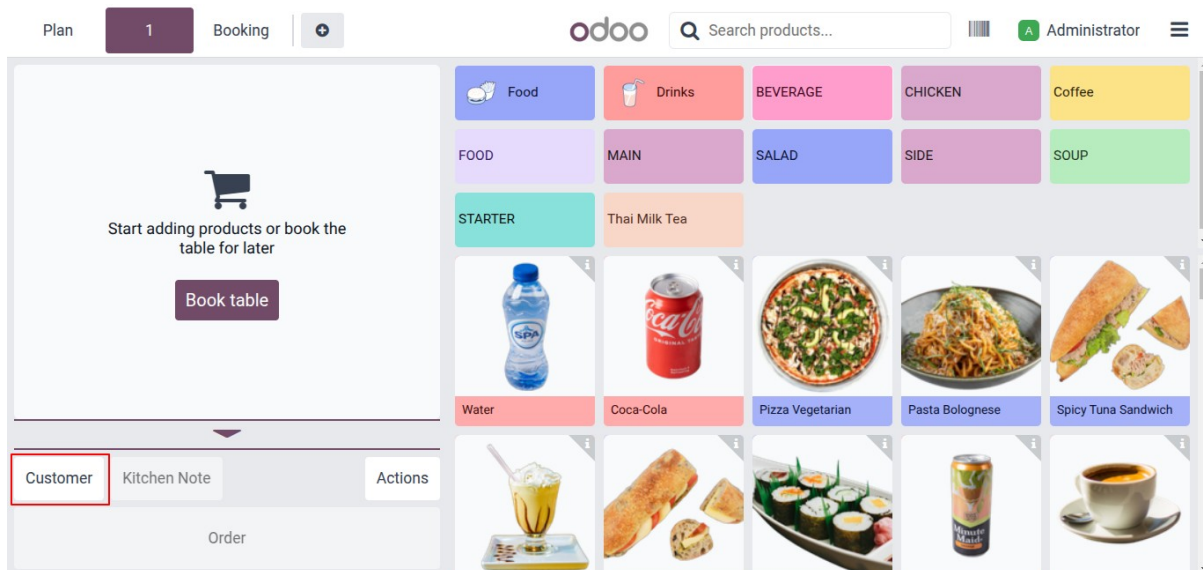

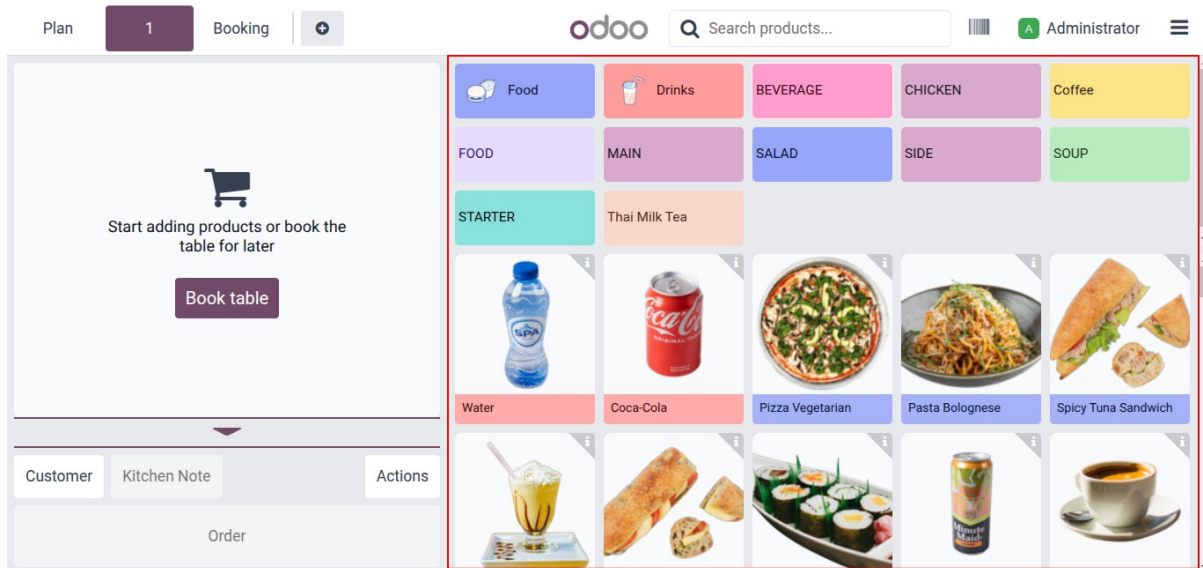

The screenshot shows the 'Inventory' settings section. The left sidebar is the same as the previous screenshot. The 'Inventory' section is active, showing various configuration options. The 'Load all remaining products in the background' checkbox is checked and highlighted with a red box.
